

Resolution 2015-20

I-77 Managed Lanes

WHEREAS, the Davidson Board of Commissioners remains acutely aware of the need for additional lanes to be built as expeditiously as possible on I-77. The status quo is likely to slow our burgeoning economic development, decimate our home values, and cause severe environmental harm. So, doing nothing is simply not an option.

WHEREAS, accordingly, the Davidson Board of Commissioners supports Senator Tarte and Rep. Bradford as they explore legislative options to provide the necessary lanes within a reasonable timeframe and we urge state leaders to work with them to find solutions for the I-77 traffic problems that are fair to the citizens of the Town of Davidson and to our neighbors.

NOW, THEREFORE, BE IT RESOLVED that the Davidson Board of Commissioners calls on all state and local leaders, and all our citizens we well, to work diligently to develop travel solutions that include mass transit to lessen the load on I-77 as traffic projections show dramatic increases in the years just ahead.

ATTEST:

Heather James, Town Clerk

John M. Woods, Mayor
